USER SECTION

User Section

1. User Authentication:

- Users will be able to create an account, log in, and log out.

REGISTER

The screenshot shows the Postman application interface. On the left, there's a sidebar with 'My Workspace' containing collections like 'Contract Testing', 'Integration Testing', etc. The main area shows a POST request to 'http://127.0.0.1:8000/blog-user/register/user/'. The 'Body' tab is selected, displaying the following JSON payload:

```
1 {
2   "first_name": "Fathima",
3   "last_name": "Basheer",
4   "email": "fathima123@gmail.com",
5   "username": "fathima123",
6   "password": "fathima123"
7 }
```

Below the request, the response status is '201 Created'. The response body is:

```
1 {
2   "message": "Registration successful!!! Login credentials sent to registered email"
3 }
```

LOGIN

The screenshot shows the Postman interface with a successful API call. The URL is `http://127.0.0.1:8000/login/token/`. The Body tab shows the following JSON payload:

```

1
2
3   "email": "fathima123@gmail.com",
4   "password": "fathima123"
5
6
7
8

```

The response status is 200 OK, and the response body is a large JSON token.

LOGOUT

The screenshot shows the Postman interface with a successful API call. The URL is `http://127.0.0.1:8000/logout/`. The Authorization tab shows a Bearer token. The Body tab shows the following JSON payload:

```

1
2   "message": "Logout Successful"
3

```

The response status is 200 OK, and the response body is a message indicating successful logout.

b. Newly registered users should receive an email upon registration.

REGISTRATION MAIL

The screenshot shows a browser window with the URL mailtrap.io/inboxes/2337573/messages/3609833679. The page title is "Inboxes > My Inbox > Registration mail". The email subject is "Registration mail" from "webmaster@localhost" to "fathima123@gmail.com". The message content is as follows:

```
Welcome to our Blogging Platform. Thank you for registering.  
First Name : Fathima  
Last Name : Basheer  
Email : fathima123@gmail.com  
Username : fathima123  
Password : fathima123  
Please Login with above credentials
```

2. Blog Posts:

- a. Users can perform CRUD operations in their own blog posts.
- b. Users can view the list & details of all blog posts, including blogs posted by other users.
- c. Users should be able to upload image attachments with the blog.
- d. A blog post should have a title, content, created time & updated time. The rest of the fields should be added as per requirement

POST LIST

The screenshot shows the Postman application interface. On the left, the sidebar lists collections, APIs, environments, mock servers, monitors, and history. The main workspace is titled "My Workspace". A search bar at the top right contains the text "Search Postman". Below it, a toolbar includes "Invite", "Upgrade", and other navigation icons.

A request card is displayed for the URL <http://127.0.0.1:8000/blog-user/post/list/>. The method is set to GET. The "Authorization" tab is selected, showing a token type and a value: eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJ... . The "Params" tab is also visible.

The response body is shown in Pretty JSON format:

```
1   {
2     "count": 6,
3     "next": null,
4     "previous": null,
5     "results": [
6       {

COMMENT UPDATE

The screenshot shows the Postman application interface. On the left, there's a sidebar with sections for Collections, APIs, Environments, Mock Servers, Monitors, and History. The main area displays a workspace titled 'My Workspace' with tabs for 'New' and 'Import'. A search bar at the top right contains the placeholder 'Search Postman'. Below the search bar are buttons for 'Invite', 'Upgrade', and environment selection. The central part of the screen shows a request configuration for a PUT method to the URL `http://127.0.0.1:8000/blog-user/post/comment/edit/5`. The 'Body' tab is selected, showing a JSON payload:

```
1 {  
2   ...  
3   "post": "6",  
4   "comment": "Amazing-experience"  
5 }
```

Below the body, the response status is shown as 200 OK with a time of 135 ms and a size of 347 B. The response body is also displayed in JSON format:

```
1 {  
2   ...  
3   "comment": "Amazing-experience"  
4 }
```

The screenshot shows the Postman application interface. On the left, there's a sidebar with 'My Workspace' containing collections like 'Contract Testing', 'Integration Testing', etc. The main area shows a POST request to `http://127.0.0.1:8000/blog-user/post/comment/edit/2/`. The 'Body' tab is selected, showing a JSON payload:

```
1 {  
2   ... "title": "5 Tips for Effective Time Management",  
3   ... "content": "Learn how to boost productivity and achieve your goals by mastering time management. Explore five practical strategies to prioritize tasks"  
4 }
```

The response status is 403 Forbidden, with the detail message: "You do not have permission to perform this action."

```

ADMIN SECTION

1. Authentication:

- a. Admins will be able to log in and log out.
- b. A new admin user can only be registered by another authenticated admin

user.

LOGIN

The screenshot shows the Postman interface with a successful login request. The URL is `http://127.0.0.1:8000/login/token/`. The Body tab contains the following JSON:

```
1 {"email": "superuser@gmail.com",  
2 "password": "femina123"}  
3  
4  
5  
6  
7
```

The response status is 200 OK, with a detailed JSON response body:

```
1 "refresh": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpxVCJ9.  
2 ey3b0zt1b198eXBLjoiMcVmcmVzaC1sInV4cC16MTY5MD5NDk40SwiaWF0IjoxNjkwMzA4NTg5LCJqdGkiOiIzZmNiN2U5MzM3OTY0NzQ5YT  
3 c2ZDM0NzExNDMzOTRjYSIsInlvZXJfaWQ1OjF9.n1bX5P5Ckcnuuyuz4UbfwsH4xLozfeb2xazobhEd5wQ",  
4 "access": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpxVCJ9.  
5 ey3b0zt1b198eXBLjoiYmNjZXNzIw1zXhijoXNjkwMzk0Tg5LCJpYXQiOjE20TAzMDg10DksImp0aSI6Ijk1MDg0NWI6ZjRizDQwMTVizM  
6 RizjMzM2IxZwRIM2QyIiwidXnl19pZC16Mx0.0_upImaM7f-Jnltuc8zzQbdZzbLp9iYz9BFRLnFx4"  
7
```

LOGOUT

The screenshot shows the Postman interface with a successful logout request. The URL is `http://127.0.0.1:8000/logout/`. The Authorization tab shows a Bearer token. The Body tab contains the following JSON:

```
1 {"message": "Logout Successful"}  
2  
3
```

The response status is 200 OK, with a detailed JSON response body:

```
1 "message": "Logout Successful"
```

REGISTER NEW ADMIN

The screenshot shows the Postman application interface. In the top navigation bar, there are links for Home, Workspaces, API Network, and Explore. A search bar is present at the top right. The main workspace is titled "My Workspace". On the left sidebar, there are sections for Collections, Environments, and History. The central area displays a POST request to the URL `http://127.0.0.1:8000/blog-admin/register/admin/`. The request method is set to POST, and the URL is specified in the "Body" tab. The response status is 201 Created, and the response body is a JSON object:

```
1 "message": "SuperUser(Admin) registration successful",
2 "data": {
3     "first_name": "admin",
4     "last_name": "2",
5     "email": "admin.2@gmail.com.com",
6     "username": "admin2",
7     "is_superuser": true,
8     "is_staff": true
9 }
```

2. Blog Posts:

- Admins can view the list & details of all blog posts.
 - Admins should be able to delete blog posts.
3. Comments:
- Admins can view the list of all comments under a post.
 - Admins should be able to delete comments.

POST DETAILS

The screenshot shows the Postman application interface. On the left, there's a sidebar with icons for Collections, APIs, Environments, Mock Servers, Monitors, History, and a search bar. The main workspace is titled "My Workspace". A navigation bar at the top includes "Home", "Workspaces", "API Network", "Explore", a search bar "Search Postman", and "Upgrade". The central area shows a request details panel for a "GET" request to "http://127.0.0.1:8000/blog-admin/post/4/". The "Authorization" tab is selected, showing a "Bearer Token" field with a placeholder "Token". Below it, the response body is displayed as JSON:

```
1  {
2   "id": 4,
3   "title": "Embracing Failure: Turning Setbacks into Opportunities",
4   "content": "Failure is often seen as a negative experience, something to be avoided at all costs. However, in reality, failure is an inevitable part of life, and how we respond to setbacks can greatly influence our personal growth and success. Embracing failure and viewing it as a learning opportunity can lead to resilience, innovation, and the development of a growth mindset",
5   "user": {
6     "id": 11,
7     "email": "fathima123@gmail.com"
8   },
9   "images": [
10    {
11      "post": 4,
12      "image": "http://127.0.0.1:8000/images/failure.png"
13    }
14  ]
15 }
```

The status bar at the bottom indicates "Status: 200 OK Time: 39 ms Size: 888 B".

CREATE POST-UNAUTHORIZED

The screenshot shows the Postman application interface. On the left, the sidebar includes sections for Collections, APIs, Environments, Mock Servers, Monitors, History, and a search bar. The main workspace displays a request overview with several recent items. A specific POST request to `http://127.0.0.1:8000/blog-user/post/create/` is selected. The request details panel shows the method as POST, the URL, and various configuration tabs like Params, Authorization, Headers, Body, Pre-request Script, Tests, and Settings. The Body tab is active, showing a JSON payload:

```
1 {  
2   ... "title": "Exciting weather",  
3   ... "content": "It's raining"  
4 }
```

The response panel below shows the status as 200 OK, with a timestamp of 23 ms and a size of 401 B. It also includes tabs for Body, Cookies, Headers, and Test Results, and a JSON preview of the response body:

```
1 {  
2   ... "Error": "Permission Denied..!",  
3   ... "Message": "Super user have no permission to create a post "  
4 }
```

DELETE BLOG POST

The screenshot shows the Postman application interface. On the left, there's a sidebar with sections like 'My Workspace', 'Collections', 'APIs', 'Environments', 'Mock Servers', 'Monitors', and 'History'. The main area displays a collection named 'Contract Testing' with items like 'Integration Testing', 'Intro to Writing Tests', etc. A specific request is selected: a DELETE request to `http://127.0.0.1:8000/blog-admin/post/delete/6`. The 'Authorization' tab is selected, showing a Bearer token. The 'Body' tab shows a JSON response with the key 'message' and value 'Post Deleted'. The status bar at the bottom indicates 'Status: 200 OK'.

4   "content": "Failure is often seen as a negative experience, something to be avoided at all costs. However, in reality, failure is an inevitable part of life, and how we respond to setbacks can greatly influence our personal growth and success. Embracing failure and viewing it as a learning opportunity can lead to resilience, innovation, and the development of a growth mindset",

Detailed description: This screenshot shows the Postman application interface. On the left, there's a sidebar with navigation links like Home, Workspaces, API Network, and Explore. Below that is a 'My Workspace' section containing a list of collections: Contract Testing, Integration Testing, Intro to Writing Tests, Mock Data Generation, Performance Testing, and Regression Testing. The main area displays a collection named 'My Workspace'. A specific API endpoint, 'http://127.0.0.1:8000/blog-admin/post/4/comments/' (using the GET method), is selected. The 'Authorization' tab is active, showing a token type and a placeholder token value. The 'Body' tab is also visible, showing a JSON response structure with comments and user details. At the bottom, there's a taskbar with icons for Runner, Capture requests, Cookies, and Trash, along with system status information like weather and date.
